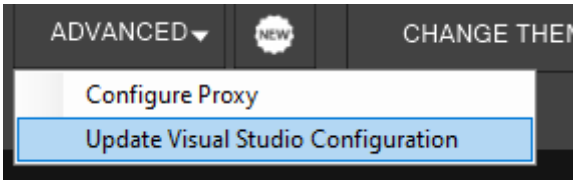
Versione 5.3.0.211

Change advanced configuration, added Auto Update configuration.



With this options you can automatically download the latest version of the file .vsconfig from
https://github.com/Microarea/polpen-installer/blob/main/.vsconfig
and then auto update the prerequisites for visual studio 2022

Versione 5.3.0.210

New default settings path, moved from %appdata%\GitDevelopmentCreator to c:\programdata\GitDevelopmentCreator\Settings
The new version automatically moved the user settings from the old folder to the new

Versione 5.3.0.201

New auto-update mechanism (no longer clickonce)
You can now uninstall the old clickonce version from control panel

The new default folder for installation is in c:\programdata\GitDevelopmentCreator
You can now “pin” the GitDevelopmentCreator shortcut anywhere on your computer, (the old version won’t update if pinned on the taskbar)

Versione 5.1.0.31

Is now possible to execute “dotnet run” command for a single service
